

Angola's power sector is characterized by its two main natural resources, petroleum and hydropower. The country has three vertically integrated but overlapping utilities: Empresa Nacional de Electricidade (ENE), Empresa de Distribui o de Electricidade (EDEL) and Gabinete de Aproveitamento do M dio Kwanza (GAMEK). The latter, GAMEK, is concerned primarily ...

In a step towards revitalizing Angola's North Coast, World Vision Angola and TotalEnergies, a global energy company, have joined forces to implement the North Coast Development Project - Nzeto and Ambriz. This transformative initiative financed by TotalEnergies, aims to empower 7,000 direct beneficiaries, including fishermen, entrepreneurs, cooperative ...

Angola with its well-established oil and gas reserves is a major player in world oil markets, but it is also a country of roughly 16 million inhabitants anxious to provide those citizens reliable, affordable access to the energy they need for their daily lives", declared William C. Ramsay, Deputy Executive Director of the International Energy ...

As Angola continues to develop its energy resources, it must balance economic growth with environmental stewardship, ensuring that both the economy and the environment thrive together. This initiative could pave the way for further investment and exploration in Angola, solidifying its position as a key player in the global energy market.

in Angola Eni has been present in Angola since 1980 and initiated oil production in 1991. Angola is a core country in the company's global oil & gas operations. In 2015, a production of 101,260 boepd (barrels of oil equivalent per day) was achieved, which amounts to approximately 6% of the Country's total production.

Energy access in Angola is limited to less than 48% of the population, with a lower access in rural areas where wood and charcoal remain the main source of energy and livelihood. Due to this, women living in these areas spend a large part of their time collecting these biomass resources and using them for cooking.

With these measures and their focus on renewable energy, Sonangol contributes even more to the promising clean energy sector in Angola, which already had a high production of non-polluting energy, placing its energy mix by the end of 2021 at 68 percent hydropower, 31.3 percent other fossil fuels and 0.7 percent hybrid (solar/fossil fuel), but ...
