

A passive solar dehydrator is a device that uses the sun's energy to remove moisture from food, thereby preserving it. It works on the principle that warm air rises, and as it does so, it draws moisture out of the food. ... Finally Experience Comfort that Matches Sophistication with ARKA Explore Now. ? A 2019 study by Zillow suggests solar energy systems can increase home value. The study's researchers analyzed home sale data of all homes sold in the United States between 2013 and 2017 and found that homes with solar energy systems were worth an average of \$4,000 more than comparable homes without solar energy systems.
