

Armenia solar farming business

How much solar energy does Armenia produce a year?

According to the Ministry of Energy Infrastructures and Natural Resources of Armenia, Armenia has an average of about 1720 kilowatt hour(kWh) solar energy flow per square meter of horizontal surface annually and has a potential of 1000 MW power production.

Does Armenia need a solar power plant?

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor. Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank.

Where is Armenia's first solar power plant located?

Located in Mets Masrik municipality, Gegharkunik region, the 55 MW solar power plant is the first-of-its-kind in the country, and it will help boost Armenia's supply of renewable energy while reducing its dependence on fossil fuels.

What is Armenia's largest solar power plant?

The 200-megawatt plant named Ayg-1 will be Armenia's largest solar power plant with a capacity of around half of Armenia's main energy generator, the Metsamor nuclear power plant. The plant is planned to be built in the Aragatsotn province in an area of over 500 hectares located in Talin, Dashtadem, Katnaghbyur and Yeghnik communities.

Are solar panels legal in Armenia?

Consumers are allowed to install solar panels with total power of up to 150 kW, and may sell any surplus to electricity distribution company Electric Networks of Armenia (ENA). In Armenia, solar thermal collectors, or water-heaters, are produced in standard sizes (1.38-4.12 square meters).

Masrik-1 (Armenia's largest solar power plant) is under construction in the Gegharkunik region; led by the Shtigen Group. Despite challenging weather conditions, the 62 MW project which spans 130 hectares ...

Upcoming projects include the 173 MWp Calatrava solar project in Negros Occidental, the 45-MWp Armenia solar venture in Tarlac, and the 212 MWp Olongapo solar farm in Zambales. With over 700MW already added, Aboitiz Power continues to push towards its target by developing approximately 3,000MW in its planned renewable portfolio.

When it comes to the solar power market, it has been given a boost by the widespread use of solar farms. In 2019, the first micro solar farm was installed in Armenia and it produced one MW of power with the capacity to be expanded with an additional 0.5 MW of solar power. This solar farm paved the way for more solar installations in the country ...

Solar panels at Armenian National Agrarian University, Yerevan. Solar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was ...
