

What makes Greece a good battery market?

Ambitious deployment targets have boosted Greece and Italy's attractiveness--Greece aims to install 6 GW of battery storage by 2030, the highest target in Europe--while good revenue stacking opportunities, where battery operators optimise between markets, supported Great Britain and Ireland's rankings.

Can a battery storage plant be built in Greece?

An increasing number of local and foreign companies are interested in building energy storage facilities in sun-loving Greece using battery technology. In fact, the Regulatory Authority for Energy (RAE) has been receiving applications for permits concerning battery storage plants.

What is Aurora's European battery markets attractiveness report?

Aurora's European Battery Markets Attractiveness Report helps investors navigate entry into new markets and maximise their competitive advantage in an increasingly crowded space." Anu Omojola, Flexibility Product Lead, European Power Markets, Aurora Energy Research, commented: "Battery storage is a game changer for the #energytransition.

How much money does Aurora have to invest in batteries?

Aurora says it has enabled 1.5 billion euros (\$1.6 billion) in battery investment and presented the report in a webinar. Forecasting a seven-fold increase in European battery power storage capacity by 2030, Aurora said this translates into an investment opportunity of over 30 billion euros, rising to almost 80 billion euros by 2050.

How much battery capacity will Aurora have in 2023?

Rising from 7.1 gigawatts (GW) of installed grid-scale battery capacity in 2023, Aurora sees capacity increasing to 51 GW by 2030 and 98 GW by 2050. Italy alone is aiming for 9 GW by 2030. Leading countries are offering secure revenue streams for the new capacity and wide wholesale price spreads, allowing battery operators to buy low and sell high.

What is Aurora Energy Research doing?

Aurora Energy Research, focusing solely on rigorous energy market modelling, is undertaking a large study that will develop long term outlooks for flexibility markets and will enable market participants to understand the revenue stacking potential of different battery systems in Greece.

Note: In order to run self-consumption calculations in Design Mode, you will need to click on Simulate upon making any changes. Aurora calculations assume a 2% degradation in battery capacity per year. Selecting a Battery. Select the ...
