

Does Austria have a reliable electricity supply network?

Austria has a highly reliable electricity supply network- thanks mainly to a diversified mix of energy sources which ensures that generating capacity can be put to optimum use at any time. This section of our website tells you everything you need to know about the Austrian electricity system.

What is Austria's energy plan?

Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas supplies. It is planned by 2030 to become 100% electricity supplied by renewable sources, primarily hydro, wind and solar. [citation needed] The Austrian energy plan made in 2020 has the following targets:

When did Austria's last coal-fired power plant close?

Austria's last coal-fired power plant closed back in 2020. Without electricity, modern-day life would grind to a halt. To make sure this does not happen, electricity production and consumption need to be precisely balanced - throughout the entire European electricity system.

Congratulations on completing 10 months in Austria, Mateus! ? It's wonderful to hear that you've been well-received and are enjoying both living and working in such a supportive environment.
