A home standby generator system consists of two products: a standby generator unit and an automatic transfer switch. The two work in concert with your home to ensure when power is lost, it's only for a matter of seconds before backup power kicks in. Benefits of home and office backup solutions. Lights keep on working; Security systems kept up ...

A standby generator automatically powers your home or business during a power outage without YOU having to lift a finger. No refueling. No extension cords. Your standby generator is powered by your natural gas or liquid propane gas supply, so run time is not limited like a backup generator by the size of its gasoline or diesel fuel tank.

Fuel is stored in an underground tank or supplied by your home's natural gas. Standby generators are larger than portable generators (7,500 watts to 48,000 watts or more), and they're more expensive, running ...

Founded in 1959, Generac was the first to engineer affordable home standby generators, along with the first engine developed specifically for the rigors of generator use, and is now the #1 manufacturer of home backup generators. Generac automatic home backup generators are permanently installed and automatically deliver power during an outage.

A permanently installed Generac home backup generator protects your home automatically. It runs on natural gas or liquid propane (LP) fuel, and sits outside just like a central air conditioning unit. A home backup generator delivers power directly to your home's electrical system, backing up your entire home or just the most essential items.

What Is a Backup Generator? A backup generator is a power source you can install that kicks in when there's a power outage. Generac backup generators switch on automatically if they sense the grid is not pumping out electricity. With other backup generators, you might need to switch it on manually, which can be dangerous and challenging.
