What is Azerbaijan's potential for offshore wind power?

Azerbaijan holds immense potential for offshore wind power - a large-scale, low carbon energy source that can be produced locally. The country has a technical offshore wind resource of around 157GW - over 20 times the country's current installed energy capacity, according to the World Bank.

Who is Azerbaijan 240 MW wind farm?

In 15+ years we have become the largest power & water developer in the GCC region, and a name to contend with internationally. The Azerbaijan 240 MW Wind Farm is a greenfield Independent Power Project IPP that is developed by ACWA Power in the Republic of Azerbaijan.

Where are the wind farms located in Azerbaijan?

Current wind farms in Azerbaijan are mainly located in the regions of Absheron, Khizi, and Gobustan. Other regions of Azerbaijan, such as Sharur-Julfa, also have the potential to contribute to wind energy generation due to their high wind density.

How much does Azerbaijan's new wind power project cost?

The US\$345 million project includes the development of wind farms in Absheron (102 MW) and Khizi (138 MW), two regions in eastern Azerbaijan. It is the first time an independent wind power project in the country is financed by foreign investment and structured as a private-public partnership (PPP).

What is the Roadmap for offshore wind development in Azerbaijan?

The Roadmap shows two scenarios for offshore wind development in Azerbaijan, a low growth and a high growth scenario. Both scenarios take and in-depth the technical, economic, environmental, social, employment, and financing aspects of establishing the country's offshore wind market.

How will the Khizi-Absheron wind power plant benefit Azerbaijan?

Upon completion the Khizi-Absheron wind power plants are expected to generate approximately 3.7 percent of Azerbaijan's current energy production, supplying 300,000 households, saving up to 220 million cubic meters of gas annually and offsetting 400,000 tons of emissions.

Depending on the average wind speed in the area, a wind turbine rated in the range of 5-15 kilowatts would be required to make a significant contribution to this demand. A 1.5-kilowatt ...
