Bahrain ex84 exagrid

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage.When comparing ExaGrid appliances deduplication in the backup application software,it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup

What does ExaGrid do?

. . . . 28Executive SummaryExaGrid provides tiered backup storagewith a unique disk-cache Landing Zone,ong-term retention repository,and scale-out architecture. ExaGrid's Landing Zone provides fo the fastest backups,restores,and instant VM recoveries. The disk-cache Lan

Does ExaGrid require rehydration?

ExaGrid refers to this capability as the "Landing Zone." Local restores,instant VM recoveries,audit copies and even tape copies do not require rehydration. Deduplication and replication are performed in parallel with backup jobs from the Landing Zone to the backend storage of the system. Only deduplicated data is replicated.

What are ExaGrid disk-based backup appliances?

ExaGrid disk-based backup appliances include scale-out computing software,which virtualizes them into a single pool of long-term capacity. Capacity load balancing of all data across appliances is automatic.

What is a multi-site ExaGrid system?

due to its high-performance data deduplication capability. In a multi-site ExaGrid environment, the onsite ExaGrid system is only sending deduplicated data--the backup data bytes that change between each backup--over t e wide area network (WAN) to the ofsite ExaGrid appliance. The ofsite ExaGrid appliance is ready for data restore and fast recove

How long does ExaGrid last?

gether, or "rehydrated," which can take hours to days.In addition, unlike other appliances that "end-of-life" in as little as 18 months and are incompatible with newer models from the same vendor, ExaGrid's scale-out architecture allows you to "mix and match" diferent capac ties and generations of appliances within a single system. Only
