The new technology is called MC Cube-SIB ESS and is touted as "the world's first high-performance sodium-ion battery" focused on grid-level energy storage. As explained by BYD's Kai Wang, the battery is also built on BYD's own Blade packaging architecture. With a capacity of 2.3 MWh, the 1200 V MC Cube can withstand a voltage range of ...

BYD's MC Cube uses blade batteries, omitting the battery pack segment. Its modular design of container assembly reduces material and assembly costs and increases the versatility of ESS containers. With other companies following suit and introducing blade or blade-like cells, the design concept of the MC Cube is gaining traction. 2.
