BSES is an exclusive global distributor of the sodium-sulfur (NAS) battery technology developed by NGK Insulators, a Japan-based industrial ceramics firm which has developed the technology designed for medium to long-duration energy storage (LDES) and other stationary applications.. Leader Energy, a subsidiary of HNG Capital, noted that it had ...

With the new partnership, BASF said it will make available its amine (ammonia-based compounds) for forming one of two electrolytes for a "battery technology that is particularly suitable for stationary storage of ...

About NAS ® batteries. NAS ® batteries consists of sodium as the negative electrode and sulfur as the positive one. A beta-alumina ceramic tube functions as electrolyte, which allows only sodium ions to pass through. When discharging, sodium is oxidized and sulfur is reduced to form polysulfide (Na_2S_x).The charging step recovers again metallic sodium and elemental sulfur.

Die BASF Stationary Energy Storage GmbH bietet Jobsuchenden eine Reihe attraktiver Zusatzleistungen. Je nach Stelle können diese unterschiedlich ausfallen. Nutzen Sie diese Übersicht zur Inspiration für Bewerbungsgespräche bei der BASF Stationary Energy Storage GmbH.
