

# Battery backup Burundi

What makes a good battery backup?

An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups. Losing power is stressful, so don't let your offline router and computer add to it.

Do you need a battery backup if you lose power?

Losing power is stressful, so don't let your offline router and computer add to it. The best battery backups can give you peace of mind that your electronics aren't in the dark while you call the electric company. Some might need a more powerful and versatile solution--particularly if you're looking to back up the equipment in your business.

Does a battery backup Protect Your Electronics?

A reliable battery backup protects your electronics in more ways than one. We may earn revenue from the products available on this page and participate in affiliate programs. [Learn more >](#) Losing power is never fun, but it can also seriously mess with your electronics, especially if you don't have a battery backup.

How many watts can a battery backup output?

In general, the best battery backups can output at least 400W. UPS models include several different features, but you'll want to focus on a couple, depending on what you want to back up. A sine-wave inverter allows a UPS to produce a clean sine waveform, which is the best type for power output.

Can a line-interactive battery backup work with sensitive gear?

According to the specs, the line-interactive battery backup can correct for "brownouts and overvoltages from 83V to 147V." At this price, though, it should be a surprise that it uses a simulated sine waveform (in backup mode) and may not perform adequately with sensitive gear.
