My ranking of the five best solar generators that use lithium-iron-phosphate batteries. The Bluetti EP500Pro is the best LiFePO4 solar generator because it leads the industry with a battery cycle life of 6,000+ cycles. Its 5,100Wh battery provides its AC ports with a maximum of 3,000W continuously.

Do batteries and generators work together with solar power?

You won't be 100% dependent on outside fuel sources, but you also won't have to invest a big chunk of change into a massive battery bank that you may never end up needing. Explore how batteries and generators can work together with solar power to keep your home or business running during power outages.

What is a solar powered generator?

Solar-powered generators--also called portable power stations--are a growing sector of the power market. I started using these a few years ago and was thrilled with having a clean, efficient charging system that doesn't roar or burn through gas.

Where can I buy a solar generator?

You can find these at your local hardware store or online retailers, and setup is easy. Generators are a less expensive way to boost the electricity your home or business has access to while the grid is down. For shorter-lived outages, you can rely on the convenient and green battery bank charged by your solar system.

What can a solar powered generator charge?

These generators can charge power tools in the shop, laptops for remote work, and personal devices like bluetooth headphones and speakers. A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage.
