The electricity grid operators of the three Baltic countries on Tuesday officially notified Russia and Belarus that they will exit a 2001 agreement that has kept Estonia, Latvia and Lithuania ...

A wall won't stop that wave. A wall in itself is pointless, no physical barrier exists that can stop people. We have literally a moat the size of a sea south of Europe, actually filled with sharks, and they still come. So you need to put guards, and they need to be willing to physically defend that wall. But that's another story.

Belarus, located in Eastern Europe (see Fig. 1), has its first nuclear power plant under construction and plans to have it operating from 2018, with Russian finance. The 2400 MWe plant is being built by Atomstroyexport is building the ...
