How many kWh does a battery backup system store?

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.

Is a whole home battery backup system worth it?

You'll need about three times as much power for a whole home backup system, which is about three times the price of a partial home setup. Partial home battery backup systems generally make more sense for the average American home, but a whole-home setup may be worth it if you live in an area with frequent blackouts.
