The first-ever directory of solar energy companies in Sudan The Guide was officially inaugurated in a hybrid event held on March 31st, 2022 at the headquarters of 249Startups- one of the leading startup incubators in Sudan.

Which energy options will be available in Sudan?

In Sudan, 2. Solar PV energy: 1000 MW (on- and off-grid) and 1000 MW (grid connected) of wind energy will be applicable. Solar CSP technology with a capacity of 100 MW (grid connected) will also be available, particularly in the northern part of Sudan.

Is Sudan suitable for solar energy production?

According to Abdeen M.O. (2009, p.9), Sudan is considered one of the best countries for exploiting solar energy due to its average sunshine duration, which ranges from 8.5 to 11 hours a day.

Could Sudan be the world's largest solar photovoltaic area?

The project is funded with \$4 billion from the government and is projected to generate a total capacity of 1.8 GW, which would make it the world's largest solar photovoltaic area. In 2018, the first phase was completed and 50 MW was generated [58, 59]. Sudan could exploit its renewable resources by adopting a strategy similar to Egypt.

Should Sudan invest in solar energy?

Given the strong support of the population for this technology and the high solar radiance across the country, Sudan, primarily represented by the government, needs to grasp this rather invaluable opportunity to invest in solar energy. However, the government's present tax policies and lack of incentives act as a large barrier against its diffusion.
