Is the Vatican spending \$660 million on Europe's largest solar power plant?

Last year Inhabitat reported that the Vatican was spending \$660 million on a massive 100MW photovoltaic installation that would effectively be Europe's largest solar power plant.

How much solar energy does the Vatican produce a year?

Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal State has been producing 300 MWh of solar energy every year since its installation in 2008. The project was planned and managed by BayWa r.e. with the PV modules, inverters and its installation donated by solar technology provider, SolarWorld.

Is Vatican City the smallest state in the world?

As Vatican City is the smallest state in the world, it does not exactly require a large amount of renewable energy to achieve this title. However, the city's solar installations, which include solar panels installed on the rooftop of Paul VI's conference hall, mean that the city can now generate enough energy to power all of its 40,000 households.

Is Vatican City the greenest state in the world?

Vatican City may be the smallest sovereign state in the world, but it is also one of the greenest. It has long been an exemplar for tackling climate change through its approach to renewable energy.
