

Which companies make electricity in Bolivia?

These companies fall under ENDE (the National Electricity Company). Bolivia's electricity production is based on thermoelectricity (71 percent), hydroelectricity (20 percent), and solar and wind (9 percent). The best sales prospects are with hydrocarbons: natural gas-related machinery, equipment, and production.

What is Bolivia's energy mix?

Bolivia's overall energy mix is dominated by fossil fuels, with natural gas (50%) and petroleum products (31%) supplying most of the country's energy in 2020. In 2021, Bolivia's national electricity agency ENDE announced its intention to generate up to 80% of the country's power from renewable sources by 2025.

What is the electricity system in Bolivia?

Like in other countries, Bolivia's electricity sector consists of a National Interconnected System (SIN) and off-grid systems (known as the Aislado). The national government's priorities for the electricity sector include providing universal access to electricity and producing surplus energy for export. [5]

What is the energy sector in Bolivia?

The Bolivian energy sector, which is almost completely nationalized, is headed by the MHE (Ministerio de Hidrocarburos del Estado Plurinacional de Bolivia) whose mission, according to their website, is to create policies that promote the integrated development of the energy sector in a manner that is equitable and in harmony with Mother Earth.

When did electricity start in Bolivia?

Electricity in Bolivia started in 1899, when tin magnate Simón Iturrí Patiño built a Diesel-generated power plant in Uncu, which provided energy to his nearby residence and the Miraflores mine. The first hydroelectric power plant was built in 1902 in Landara.

Who regulates the energy industry in Bolivia?

The AJAM (Autoridad Jurisdiccional Administrativa Minera) is responsible for permitting and exploration licenses. The main regulatory bodies in Bolivia are: AE (Authority of Fiscalization and Social Control of Energy), the Vice Ministry of Electricity and Alternative Energy, and the Vice Ministry of High Energy Technologies.
