An external storage system, or storage controller, is a device that coordinates and controls the operation of one or more disk drives. A storage system synchronizes the operation of the drives with the operation of the system as a whole.. The system can manage a combination of internal and external storage and represents all the detected storage as MDisks.

LSI Logic competes in three main market areas: consumer products, communications, and storage components. The company planned to spin off a fourth business area, storage systems, as the public company Engenio Information Technologies, Inc., in 2004. LSI Logic was a defining force in the customized semiconductor market through the mid-1990s.

NetApp (NASDAQ: NTAP) today announced that it has entered into a definitive agreement to purchase the Engenio external storage systems business of LSI Corporation (NYSE: LSI), a publicly held ...

Last week's acquisition of Engenio, LSI's external storage unit, by NetApp caught a lot of people by surprise. While NetApp's desire to continue to grow through acquisition was no great secret, its decision to grow by acquiring Engenio did not on the surface initially make a lot of sense to me. After all, why would NetApp, who consistently pokes EMC in the eye for ...

NetApp, Inc. is an American data infrastructure company that provides unified data storage, integrated data services, and cloud operations (CloudOps) solutions to enterprise customers. The company is based in Cork City, Ireland. [2] It has ranked in the Fortune 500 from 2012 to 2021.
