

What is a Calala Bess?

Covering 7 hectares of land and containing up to 960 battery enclosures and required infrastructure, the Calala BESS will act as a large-scale power generator and connect to the NSW's electricity transmission grid. The Calala BESS will store up to 300MW of energy which can supply 4 hours of electricity to power up to 80,000 NSW homes.

How much energy does the Calala Bess store?

The Calala BESS will store up to 300MW of energy which can supply 4 hours of electricity to power up to 80,000 NSW homes. When will construction start, and how long will the BESS last? Construction of our Calala BESS will begin from 2023 to 2024, taking up to 12 months to complete.

How many MW is a Bess?

The construction and operation of a BESS with an estimated capacity of up to 300 Megawatts (MW) / 1200 Megawatt hours (MWh). Associated infrastructure, including underground grid connection to the Tamworth 330kV substation.

How long does a Calala Bess last?

Construction of our Calala BESS will begin from 2023 to 2024, taking up to 12 months to complete. It can last for up to 25 years, after this period the BESS will be decommissioned, and the batteries recycled and repurposed. The information contained in this document is accurate as of December 2022.

How big is a Bess site?

The total size of the site area is approximately 36 hectares, with the footprint of the facility covering a total of 8.9 hectares (**note - this figure relates to the footprint of the BESS only and excludes any easements and underground transmission lines). The land is currently zoned as RU4: Primary Production Small Lots.

Is Calala Creek a perennial watercourse?

The study area contains two creek lines; Calala Creek, a second order non-perennial watercourse located in the northern portion and a first order, non-perennial tributary of Calala Creek, located in the central portion (Figure 5).

Calala BESS. Tamworth, New South Wales. Equis is developing a 300MW/600MWh Battery in Calala, Tamworth to help provide New South Wales with reliable energy. [Learn More. ...](#) The most advanced large scale BESS project in Victoria and will be one of the biggest batteries in the world.
