

Cameroon hpe smart storage battery 1 firmware

What is the HPE Smart Storage Battery?

The HPE Smart Storage Battery is a lithium-ion, low-halogen centralized backup source and is required to back up the write cache content onto flash memory on the HPE Smart Array Gen9 and newer storage controllers in case of an unplanned server power loss.

What is HPE pre-failure notification for HPE smart storage battery failures?

HPE has added a pre-failure notification for HPE Smart Storage Battery failures to HPE Integrated Lights Out (iLO) 4 Firmware Version 2.55. The pre-failure algorithm reads the battery information in real time, to determine if the battery is expected to fail. This allows users an opportunity to schedule a time to replace the battery.

How many batteries does a HPE smart storage hybrid capacitor need?

Only one battery is required per server as it can support multiple devices. The HPE Smart Storage Hybrid Capacitor is a battery-free technology for power storage that provides data protection for cached data while eliminating costs and environmental impact of lithium-ion batteries.

How are HPE firmware binaries distributed?

HPE and partner vendor (Intel, Mellanox, Marvell, etc.) firmware binaries are packaged in Smart Components. They are distributed individually via the online HPE Support Center or grouped in support packs like the Service Support Pack for ProLiant (SPP).

How does the HPE pre-failure algorithm work?

The pre-failure algorithm reads the battery information in real time, to determine if the battery is expected to fail. This allows users an opportunity to schedule a time to replace the battery. HPE recommends replacing the battery within one week, to avoid impact to production that may happen when the battery fails.

What is HPE smart hybrid capacitor?

For those running HPE Gen10 servers, the HPE Smart Hybrid Capacitor is a centralized backup power source supporting multiple controllers where the NAND flash memory on HPE Smart Array Performance Class controllers and the HPE Smart Hybrid Capacitor work together to save cached data in the event of unplanned server power loss.
