The Central African Republic's mineral reserves primarily consist of diamonds and gold, however the sector remains largely informal and has historically been a source of conflict. The Central African Republic was suspended from the EITI in 2013, when the EITI Board concluded that the EITI could not be effectively implemented due to political ...

Construction will start at the 25MWp Bangui Solar PV plant, which includes 25MWh of battery storage, in April, and commercial operations are expected in June 2022, the World Bank Group (WBG)'s Boris Ngouagouni told African Energy. Ngouagouni said Covid-19 had not significantly delayed the project. The WBG signed an engineering, procurement and ...

Potentially Important Food Plants of Central African Republic has been produced to provide information on approximately 40 edible plants that are known to grow in Central African Republic. These plants come from all the major food groups and have been chosen because of their high nutritional value.

Energy intensity - shown in the chart above - is one important metric to monitor whether countries are making progress in reducing emissions. The other key part of this equation is carbon intensity: the amount of CO₂ emitted per unit of energy. We can reduce emissions by (1) using less energy; and/or (2) using lower-carbon energy.

As part of efforts to attain energy security, the Central African Republic (CAR) has launched a 25 MW solar power generation facility, inaugurated by President Faustin-Archange Touadra last week. Developed ...

5 • In 2024, the humanitarian community in CAR plans to assist 1.9 million most vulnerable people.
