

Does Chad have a solar plant?

In Chad only 1 in 20 people have electricity. But the Central African country has lots of sun. A UK company is developing the first solar plant in one of the world's poorest places. Robert Pacquement and the Djermaya Solar development team do not shy away from a challenge.

Will a solar power plant save money in Chad?

The solar photovoltaic plant at Djermaya, 30km north of N'Djamena, the capital, "will be the first utility-scale renewable energy project and will be the first privately owned, financed and managed power plant in Chad. It will generate significant savings for the country," Pacquement explains.

How many MW of solar will Chad have by 2021?

The International Renewable Energy Agency says Chad had 1 MW of grid-connected solar by the end of 2021. Savannah Energy has signed a deal with the government of Chad to develop up to 400 MW of solar-plus-battery projects in the country.

Can a UK company develop a solar plant in Chad?

A UK company is developing the first solar plant in one of the world's poorest places. Robert Pacquement and the Djermaya Solar development team do not shy away from a challenge. His Djermaya Solar development team has worked with Chad's government for the past three years to support an ambitious solar project. It is vital work.

What is Djermaya solar?

Development of Djermaya Solar will be phased to gradually integrate renewable power into Chad's national grid. The first 34MWp phase secured financing in 2021. Construction start is planned for 2022 and operations for 2023. This will be followed by a second 26MWp phase.

Who is investing in Djermaya solar?

InfraCo Africa, a privately managed company backed by public funds from the UK, Switzerland and the Netherlands that's part of the Private Infrastructure Development Group, will invest up to US\$3 million into Djermaya Solar and, through its developer Aldwych Africa, provide the resource and expertise needed to develop this pioneering project.
