

# Christmas Island solar panels on credit

How do I qualify for a solar panel tax credit?

In order to qualify for the solar panel tax credit, you must own your home (not lease or rent) and you must pay enough taxes to the federal government (tax liability) that the Residential Clean Energy Credit can offset your tax payment.

What is the Federal residential solar energy credit?

The federal residential solar energy credit is a tax credit that can be claimed on federal income taxes for a percentage of the cost of a solar PV system paid for by the taxpayer. (Other types of renewable energy are also eligible for similar credits but are beyond the scope of this guidance.)

How much is a state solar tax credit?

All state solar tax credits can be claimed in addition to the federal government's investment tax credit. They vary in amount, but are usually a percentage of the total cost of the system. Almost all state tax credits have a maximum, with current amounts between \$500 and \$5,000, depending on the state.

Can a homeowner claim a solar tax credit?

As a homeowner, you can claim a federal solar tax credit for the amount of money that you pay towards installing solar and reduce the amount you owe when you file your yearly federal tax return. (The solar tax credit does not apply to state tax or any local taxes.)

How do state solar tax credits work?

People who install solar in participating states earn extra money back on their state income tax bill the year after installation. All state solar tax credits can be claimed in addition to the federal government's investment tax credit. They vary in amount, but are usually a percentage of the total cost of the system.

Can I get a solar tax credit if I make too much money?

There is no household income limit on the federal solar tax credit. Therefore you cannot be barred from tax credit eligibility because you make too much money or are in a high-income tax bracket. If you are in a low-income tax bracket, then you may be able to qualify for further federal incentives to reduce your total solar investment costs.
