

What if Niger doesn't have electricity?

Only one in seven Nigeriens have access to modern electricity services, and just four percent of rural residents have access through the national utility. Without power, there is no viable path for economic growth and development, and few prospects for people living below the poverty line. But Niger has a plan.

Why does Niger experience power cuts?

Power cuts are unusual in Niger, which normally has regular and reliable electricity supplies. However, the country is heavily dependent on its neighbor to the south, Nigeria, as its main electricity supplier.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.
