

Cuba dynes tower

What is the tallest building in Cuba?

The FOCSA Building is a residential and commercial block in the Vedado neighborhood of Havana, Cuba. At 121 meters (397 ft), it was the tallest building in Cuba for over 6 decades until the construction of La Torre López-Callejas. [2]

Who designed the FOCSA Building in Havana?

The FOCSA Building in Havana, Cuba was designed by the Cuban architects Ernesto Gómez Sampera and Mercedes Díaz. Ernesto Gómez Sampera played a significant role in shaping the architectural landscape of Havana during the mid-20th century.

What is a neo-classical building in Havana?

The inside of the building, not as sumptuous as the exterior, is neo-classical in style. This square combines an ample esplanade, a memorial and a giant statue paying tribute to Cuba's national hero Jose Marti, and a tower that marks the highest point in Havana (the FOCSA building has more stories, but it's at a lower level above the sea).

How big is the Bacardi Building in Havana?

1,082.25 m² (11,649.2 sq ft) per flr. The Bacardi Building (Edificio Bacardí) is an Art Deco Havana landmark designed by the architects Esteban Rodríguez-Castells and Rafael Fernández Ruenes and completed in 1930. It is located on the corner of Calles Monserrate and San Juan de Dios on a 1,320 m² (14,200 sq ft) lot in Las Murallas, Old Havana.

Why is the FOCSA Building important to Havana?

The FOCSA Building has had a significant impact on Havana's skyline, emerging as one of its most recognizable landmarks. Its towering presence and unique design contribute to the city's architectural landscape, adding a touch of modernity and sophistication.

When did Cuba build its first concrete building?

Work began in February 1954 and finished in June 1956. At the time of construction it was the second-largest residential concrete building in the world, second only to the Martinelli Building in São Paulo, Brazil. It surpassed the López Serrano Building in height, which had been Cuba's tallest building.
