How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

How many Bess facilities does smgp have?

Since the first commissioned grid-scale 10 MW BESS facility in Masinloc in 2016, SMGP has completed and commenced the commercial operations of 21 BESS facilities located nationwide. In 2022, SMGP has completed a total of 390 MWh BESS capacity and is in the process of completing the additional 580 MWh this year.

Will smgp build a battery storage network?

SMGP is eyeing to complete one of the largest integrated battery storage networks in the world - a total of 32 battery storage stations, which will have a combined capacity of 1,000 megawatts. The company said its BESS projects would allow the safe integration of renewable energy to the national grid.

Does smgp - Limay power plant support water for all?

In 2017, San Miguel Corporation (SMC), the mother company of SMGP, launched the Water for All initiative to reduce water consumption in all of its plants by 50% by 2025. This project continued amidst the pandemic. SMGP - Limay Power Plant shares the same ambition and is in full support of SMC's Water for All initiative.

Is smgp a shareholder of UPSI?

SMGP, as shareholder of UPSI, has also entered into relevant agreements as sponsor and shares security grantor of its subsidiary in the project financing. SMGP is eyeing to complete one of the largest integrated battery storage networks in the world - a total of 32 battery storage stations, which will have a combined capacity of 1,000 megawatts.

How many Bess facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.
