What happened to Delta Crescent energy?

On December 31, the U.S. sanctions waiver granted to Delta Crescent Energy will expire, thereby ending the company's efforts to help local partners in northeast Syria stabilize their economy through the oil trade. The Biden administration declined to renew the license last spring.

What is Delta Crescent energy doing with SDF oil?

In 2020, Delta Crescent Energy, a little known U.S. oil company, signed a contract with the SDF that allowed the company to extract oil. The State Department has not disclosed many details about the deal, but a report by U.S. media outlet Politico said that some of the oil was refined to use in the region, with the rest exported to Iraq and Turkey.

What is the Delta Crescent energy contract?

The contract is in line with President Donald Trump's long-standing goal of securing US control over oil fields in the region, and gives a little-known American firm, Delta Crescent Energy, wide purview to develop and upgrade more than half of the Syrian oil fields under the control of the SDF, said one of the company's founders.

What would happen if Delta Crescent withdraws from Syria?

If Delta Crescent is forced to withdraw and no U.S.-approved alternative takes its place, oil development in Syria would merely change hands--presumably to the Russian-controlled Gulfsands Petroleum--and sales to the Assad regime would likely increase.

Is Delta Crescent a private company?

Delta Crescent operates under the protection of the SDF and the U.S. military in northeast Syria, the sources said. Pentagon spokesperson Cmdr. Jessica McNulty noted that the Department of Defense "does not have an affiliation with any private companies in regard to the oil fields in northeast Syria."

Why did George Dorrier join Delta Crescent energy?

The two realized, one of the Delta Crescent Energy founders explained, that they needed someone with oil expertise, and eventually recruited Dorrier to join them. Dorrier was among the first American oil executives to vie for contracts with Baghdad following the US invasion of Iraq in 2003.

Saudi Delta Group is a pioneer in energy efficiency in the Kingdom of Saudi Arabia.
