

In contrast, the investments outlined in Romania's National Energy and Climate Plan (NECP) do not ensure a decarbonised energy sector by 2040. The Romanian power sector would emit 9.2 MtCO<sub>2</sub> in 2030 (which can be halved in a lower-gas scenario) and 3.5 MtCO<sub>2</sub> in 2040, at slightly higher wholesale electricity prices.

This study aims to study the energy strategy of Romania in correlation with the EU strategy in the turbulent period of pandemics and conflict between 2019 and 2023, with the latest available data. ... Energy Econ. 2023, 125, 106827. [Google Scholar] Vezzoni, R. Green Growth for Whom, How and Why? The REPowerEU Plan and the Inconsistencies of ...
