

# Ecuador solar electric generator

How much power does Ecuador need a year?

Electricity demand grows by 200 MW every year, meaning Ecuador should add 250 MW or 300 MW of new power generation each year. However, Ecuador has added minimal additional generation in the last three years.

How much energy does Ecuador produce in 2022?

In 2022, Ecuador's generation capacity was 8,864 MW, of which 5,425 MW (61 percent) corresponded to renewable energy and 3,438 MW (39 percent) to non-renewable energy sources (fossil fuels derived from oil and natural gas).

Does Petroecuador use diesel to power its thermal power plants?

It is also increasing diesel purchases from Petroecuador to power its thermal electric power plants. The 1500 MW Coca Codo Sinclair hydropower plant generated 7,202 GWh in 2022 (22 percent of the 33,008 GWh of gross electricity generation).

What is Ecuador's largest hydropower plant?

CCS is the country's largest hydropower plant by generation capacity. Ecuador's state-owned electricity company CELEC imports electricity from neighboring Colombia, costing \$400 million in 2022. It is also increasing diesel purchases from Petroecuador to power its thermal electric power plants.

How many hydropower plants are there in Ecuador?

Ecuador has eight large scale hydropower plants in the East with 3,885 MW of installed capacity. This includes Coca Codo Sinclair (1500 MW) and Paute Molino (1,100 MW).

Will Ecuador have a power shortage in 2023?

Ecuador is experiencing power generation shortages in 2023, and analysts expect them to extend to 2024. The Energy Ministry and CELEC plan to issue tenders to add additional generation. Future projects under consideration include hydro, geothermal, wind, and biomass.

In Ecuador, solar energy has gained prominence with 34 solar or photovoltaic energy plants spread across the country. The primary source of solar energy is the sun, which emits electromagnetic radiation in the form of ...
