

El Salvador power pack container

What is a 378-megawatt energy plant in El Salvador?

Located in the Municipality of Acajutla, Sonsonate, the 378-megawatt project is an LNG-to-power facility that will supply approximately 30% of the energy demand of El Salvador and contribute to the diversification of the country's energy mix through new clean energy generation and reduced reliance on heavy fuel oil and imported diesel.

When did El Salvador's EDP power plant start operating?

Despite the enormous challenges, including supply-chain disruptions, travel restrictions, airport closures, global financial volatility, and Salvadoran COVID-19 mitigation measures and regulations, the power plant began commercial operation in October 2022. EDP is a transformative investment in El Salvador's clean energy future.

How much money is invested in El Salvador?

In total, the project represents an approximately \$1 billion investment in El Salvador. At least \$10 million will be invested in economic and social works during the term of the power purchase agreements, strengthening local communities with a more than \$500,000 investment per year.

Who financed El Salvador's infrastructure project?

The more than \$1 billion transformative infrastructure project, the largest-ever private investment in El Salvador, was financed by leading global financial institutions U.S. International Development Finance Corporation, International Finance Corporation, IDB Invest, Finnish Export Credit Ltd and KfW IPEX-Bank.
