Utility-scale batteries are massive energy storage systems designed to store electricity on a large scale, typically for grid support, renewable energy integration, and backup power. They help balance supply and demand, ensuring a stable and reliable power supply. Here are some of the most common types of utility-scale batteries:

Green Mountain Power (GMP), a utility in the US state of Vermont, has requested approval on US\$30 million in funding to expand a home battery energy storage scheme. The utility filed a request with the Public Utility Commission of the state of Vermont earlier this month for an extra US\$30 million for customer and
