Who is enervervenue's CEO?

Andrzej leads the development of EnerVenue's energy storage systems. He has 25+ years of experience designing and commercializing technology products. Prior to EnerVenue, Andrzej developed Stem's first lithium-ion stationary energy storage and power monitoring systems.

What is the Côte d'Ivoire-Liberia-Sierra Leone-Guinea Interconnector project?

The Côte d'Ivoire-Liberia-Sierra Leone-Guinea (CLSG) interconnector project is a project under the West African Power Pool (WAPP) program that aims to provide an increased supply of electricity to Côte d'Ivoire, Liberia, and Sierra Leone to meet the growing demand and will create an incentive for hydropower potentials that exist in Sierra Leone.

How much power does Sierra Leone need?

Sierra Leone aims to increase its installed capacity to 350MW by 2023. Currently, the country has an installed capacity of 100MW and plans to fully utilize its potential to exploit the 1,240 megawatts capability for local consumption and export in the sub-region.

1 ??· Sierra Leone cannot afford to continue on this trajectory. The country's survival depends on a collective effort to reclaim its democracy and demand accountability from those in power. This requires the courage to speak out against injustice, even in the face of intimidation, and the resolve to build a nation that prioritizes the welfare of ...
