

Energon group Bahrain

Who is Energon?

ENERGON -- We develop and supply energy storage and power generation solutions since 1998. More than 20 years of development history allows us to provide an individual approach in solving a wide range of tasks in the energy sector. Industrial rechargeable batteries, solar modules & solutions on their basis are in our focus.

How much energy does Bahrain need?

In order to achieve these objectives, Bahrain will need 280 MW of electricity generation capacity from renewables by 2025, increasing to 710 MW by 2035. According to the Sustainable Energy Authority (SEA), the country is targeting solar, wind and energy from waste to hit these targets.

Does Bahrain have solar energy?

Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

Why should you choose Energon?

ENERGON is responsible to its partners and is absolutely confident in the quality of the products supplied. Implementation of sustainable development policy and responsible resources consumption are important priorities for ENERGON. Minimal terms of warranty replacement (less than 18 hours). Advanced logistics and warehousing system.

Does Bahrain have a hydrogen industry?

Bahrain has taken its first steps to develop a domestic hydrogen industry. In November 2020 the kingdom signed an agreement with hydrogen producer Air Products to assess the potential development of a hydrogen economy in the country. The SEA unveiled plans for a 4-MW green hydrogen plant in December 2021, which would be a first for the region.

Will Bahrain commercialise hydrocarbons by 2023?

Though there had been limited progress as of May 2022, the kingdom is hoping to commercialise the discovery by 2023. Under the Bahrain Economic Vision 2030 plan, the kingdom is striving to transition its economy away from a dependence on hydrocarbons.

Established in 2012, Energon has grown into a leading organization in the petro products industry.
