

What is the largest solar power plant in Albania?

In late 2023 the 140MW Karavasta solar power plant was completed, having taken Voltalia of France 15 months to build, it is the largest in Albania to date. A 100 MW solar power project called Spitalla in Durrës area is planned to be built next. Albania has enormous potential for electric energy from wind power.

Is Albania a good place for solar energy?

Albania gets about 2100-2700 hours of sunshine in a year so it has a great potential for solar energy. Solar energy is easily accessible since most energy comes directly or indirectly from the sun. It could be used for heating and lighting homes, commercial, and industrial buildings.

Is Albania looking at wind and solar power?

But besides from controversial gas from controversial countries, Albania is also looking at wind and solar power. There are currently at least 13 solar projects in the pipeline with a capacity of 1.24 GW between them. In addition, a recent wind farm proposal has been given strategic investment status in the country.
