

What happened to Suncor Energy in Syria?

**Canada's Suncor Energy Inc suspended its Syria operations in 2011. Its primary asset is the Ebla development located in the Central Syrian Gas Basin covering more than 300,000 acres (approximately 1,251 square kilometres). The gas field was producing 80 million cubic feet of natural gas per day.

Why is Syria reliant on Iran?

Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector. **Syria has not exported oil since late 2011, when international sanctions came into force, and has become dependent on fuel imports from Iran to keep power supplies running.

How much oil does Syria produce a day?

**Prior to sanctions, Syria produced some 383,000 barrels per day (bpd) of oil and liquids, according to previous analysis by the U.S. Energy Information Administration (EIA). **Oil and liquid production fell to 40,000 bpd in 2023, according to separate estimates from the Energy Institute.

Why did a tanker carry Iranian oil to Syria?

LONDON, Dec 9 (Reuters) - A tanker carrying Iranian oil to Syria turned round in the Red Sea to head away from its original destination after the fall of Syrian President Bashar al-Assad. Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector.

The main current and future challenges for energy supply in Syria are scarcity and increasing prices of fossil fuels, the need to reduce energy intensity to stay competitive, and a need to increase capacity to deal with those issues.
