Equis energy Grenada

David Russell, cheif executive of Equis and chairman of Equis Energy, said: "The investment by GIP and its partners is exciting news for the development of renewable energy in the Asia-Pacific.

Equis is the largest renewable energy IPP in the Asia-Pacific region based on installed capacity, with 180 assets comprising 11,135 MW in Australia, Japan, India, Indonesia, the Philippines, Taiwan and Thailand. Equis Energy operates from 15 Asian offices, employing over 300 professionals, including 100 engineers and 38 local development.

The proposed Calala Battery Energy Storage System (BESS) is located approximately 5.8km southeast of the Tamworth CBD within the Tamworth regional municipality. The BESS has a charge/discharge capacity of up to 300MW and an energy storage capacity up to 600MWh, which is enough power to supply electricity for up to 570,000 homes for two hours.

Singapore-headquartered Equis is the largest renewable energy independent power producer in Asia-Pacific, with over 180 assets comprising solar, wind and hydro generation spread across countries ...

Equis also develops, builds, owns and/or operates all required distribution, transmission and grid connection infrastructure associated with its energy systems. The primary objectives of Equis" energy business is to develop infrastructure that reduces both power prices and CO 2 emissions, whilst improving energy efficiency and reliability.

Mahesh moved to Singapore in 2016 where he led the sell-side M& A process for the sale of Equis Energy, which was valued at an enterprise value of US\$5 billion, marking it as the largest renewable energy transaction in the Asia-Pacific ...

Equis Energy delivers RHI accreditation for 150 kWth Biomass District Heating System Swansea Valley Holiday Cottages received confirmation from Ofgem today that their wood chip heating system has been accredited under the Renewable Heat Incentive"s "Small Biomass" Tariff. Equis Energy successfully delivers ROC accreditation for 10.3 MWp Solar ...

Melbourne Renewable Energy Hub will be a \$1.1bln energy storage facility supporting Victoria"s renewable

energy zones and stabilising Victoria"s energy infrastructure. This will allow increased solar and wind integration into the grid which reduces volatility and lowers electricity prices.

The proposed Lower Wonga (Woolooga) Battery Energy Storage System (BESS) is located approximately 0.8km southwest of the Woolooga Substation on Gympie Woolooga Road. The BESS has a battery energy storage capacity up to 200MW and discharge capacity up to 800MWh, which is enough power to supply electricity for up to 380,000 homes for four hours.

Equis Mark 1 had switched focus from airports, roads and fossil fuel plants to clean energy after stumbling across a too-lucrative-to-be-true solar feed-in tariff in Thailand, and hadn't looked ...

Equis is actively pursuing infrastructure development and investment across the Asia-Pacific region, with a primary focus on Australia, Japan and South Korea. ... Leverage our expertise, experience, proven track record and strong relationships to develop world-class energy assets that have a relevance for decades to come.

"It"s the entire 100% of the renewable assets of Equis Energy Asia-Pacific-wide." The firm has 4.4GW of utility-scale solar, wind and hydro generation assets in a range of countries ...

When renewables private equity group Equis Energy was sold to GIP for \$5 billion - \$3.7 billion of it equity investors walked away with well over double their initial investment. The founders of Equis made around \$800 million. But why was more than \$500 million of the proceeds ringfenced into a vehicle called Equis Renewables, in which the ...

Singapore-based Equis Energy is the largest renewable energy independent power producer in the region, with more than 180 assets, comprising 11,135MW, either in operation, in construction or in development in Asia-Pacific. Equis Energy has an expansion programme and in August unveiled the largest solar farm in Australia.

Equis is the largest renewable energy IPP in the Asia-Pacific region based on installed capacity, with 180 assets comprising 11,135 MW in Australia, Japan, India, Indonesia, the Philippines, Taiwan and Thailand. Equis Energy operates ...

At Equis, he specialises in photovoltaic generation, energy storage and electrical high voltage distribution, focusing on technology development, system design, procurement, and construction. Prior to joining Equis, Vincenzo served as a Senior Electrical Engineer at Raygen Resources, where he was responsible for product and system development ...

Equis Energy is a unique success story in the APAC region as it has systematically executed its growth strategy since its founding five years ago. In that period, Equis Energy has become one of the leading renewable ...
