

What is the largest power plant in Estonia?

The largest power complex in the country, Narva Power Plants, consists of the world's two largest oil shale-fired thermal power plants. The complex used to generate about 95% of total power production in Estonia in 2007. Falling to 86% in 2016 and 73% in 2018.

How many boilers does Eesti Power Plant have?

The Eesti Power Plant initially had sixteen TP-101 boilers and eight 200 MWe steam turbines. Fourteen boilers and seven turbines are currently in service. In 2003, the Unit 8 was reconstructed to use the CFBC technology. Eesti Power Plant has two 250 metres (820 ft) tall flue-gas stacks, which are the tallest in Estonia.

When did Narva Elektriijaamad start building a new power plant?

On 14 January 2011, Narva Elektriijaamad signed a contract with the French power engineering company Alstom for construction of the new Auvere Power Plant next to the existing Eesti Power Plant. The initial EUR540 million contract foresaw a construction of a 300 MW oil shale-fired unit which was completed 2015.

Estonia's electricity sector is interconnected with regional energy markets, particularly through connections with Finland, Latvia, and Russia. The direct electrical interconnection with Finland was established in 2006 and was further strengthened by the Estlink 2 interconnector in 2014. Estonia joined the Nord Pool Spot market by 2012, securing its own price area within this regional electricity market.

Since our establishment in 2006, Nova Power New Energy Co., Ltd. has been at the forefront of revolutionizing the electric vehicle (EV) charger industry. Based in Shenzhen, the global hub of innovation, we specialize in crafting cutting-edge EV charging solutions that redefine the way the world powers its electric vehicles.
