

# Falkland Islands solar power station

Could the Falklands become an energy powerhouse?

The Falklands might seem an odd candidate to become an energy powerhouse. The likely presence of commercial quantities of oil has been known for decades, yet successful development has always seemed improbable. The Islands were too remote, the weather too inhospitable, the cost too high. Now, however, the odds are shortening.

How much electricity does the Falkland Islands use?

The Falkland Islands generates 19,000 MWh of electricity as of 2016 (covering 108% of its annual consumption needs). The Falkland Islands consumed 17,670 MWh of electricity in 2016. The Falkland Islands did not import any electricity in 2016. The Falkland Islands didn't export any electricity in 2016.

Does the Falklands need a new wind farm?

But the Falklands feel it is not enough and besides the current wind farm is reaching its renewal date. No wonder then that notice has been given of the planning applications submitted for the Farm Expansion of Sand Bay Wind Farm to include 3 by E70 Enercon wind energy converters and battery storage. FIG and c/o Glenn figure as the applicant.

Where can I find a plan for the Falkland Islands?

FIG and c/o Glenn figure as the applicant. The plans and details can be viewed at the Planning Office, Secretariat, Stanley and on the Falkland Islands Government Planning & Building Services Facebook page. Anyone wishing to comment on these applications must do so in writing, to the Planning Officer, by 2 February 2024.
