Should the Faroe Islands be self-sufficient?

Isolated in the North Atlantic Ocean, the Faroe Islands need to be self-sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries. SEV operates six hydro power plants, three thermal power plants, three wind farms and one solar power plant.

How much solar irradiation will the Faroe Islands produce in 2021?

At the same time, the plant is the first major photovoltaic system in the Faroe Islands, and although we are only in mid-November and solar irradiation in 2021 is more than 10% below normal levels, with 161,200 kWh it has already produced more than the estimated nominal production.

Why is SEV the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self-sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

Can the Faroe Islands convert their energy system to renewable sources?

A number of researchers have studied the conversion of the Faroe Islands' energy system to renewable sources. These studies looked at a single island or more broadly [51, 53] and their primary focus was on the techno-economic optimization of the new system.

What are the key innovations in energy planning for the Faroe Islands?

The key innovations of this paper for islands, and global energy transition planning, are: The central incorporation of social perspectives into the energy planning for the Faroe Islands via explicit elicitation of criteria weights of local stakeholders.

A wet day is one with at least 0.04 inches of liquid or liquid-equivalent precipitation. In Faroe Islands, the chance of a wet day over the course of November is essentially constant, remaining around 47% throughout. For reference, the year's highest daily chance of a wet day is 52% on January 4, and its lowest chance is 24% on June 7. Over the course of November in Faroe ...
