

France solar panels pros and cons

Are solar panels a good option in France?

More and more companies are either selling, or installing, solar panels for people across France. This, coupled with rising energy costs, continues to make solar panels appear an attractive alternative to gas or electric energy sources, for both homeowners and businesses. Here we answer eight common queries about solar panel installation in France.

How much do solar panels cost in France?

Pricing will depend on the power capacity of the panels, but as of 2022 (and without considering any government assistance), you can expect to pay approximately EUR9,000 to EUR15,000 to install solar panels in France. You can sell the energy produced back to the grid.

What are the pros and cons of solar energy?

The pros of solar energy include that it is a sustainable alternative to fossil fuels and has a low impact on the environment and the potential for any country to produce it. The cons are that it only produces energy when the sun is shining, needs a significant amount of land, and that certain solar technologies require rare materials.

Are there grants for solar panels in France?

There are also grants available for energy conservation (but not photovoltaic solar panels) as part of the home improvement grant regime 'MaPrimeRénov' run by Anah, the housing renewal agency, but these are means-tested. How much does it cost to install solar panels in France?

Are there tax credits for solar panels in France?

Since 1st January 2014 there are no longer any tax credits available for the installation of photovoltaic solar panels. Nevertheless, in France, as in many other countries, there are incentives in place for property owners to sell electricity back into the grid at preferential prices.

What are the different types of solar panels in France?

The most common type of solar panel in France is the 'photovoltaic solar panel' or PV (Panneau solaire photovoltaïque). These are typically fixed to the roof of the home, and they operate by using photovoltaic cells to generate an electric current when hit by the sun's rays. Within the PV type of solar panel, there are three sub-types in France:

While it's sustainable and can save you a lot of money in the long run, the initial cost can be hefty, and not every roof or property is solar-friendly.
