

Freyr battery gigafactory Jordan

Where are Freyr batteries made?

FREYR has commenced building the first of its planned factories in Mo i Rana, Norway and announced potential development of industrial scale battery cell production in Vaasa, Finland, and the United States.

Does Freyr battery have a Giga America plant?

Freyr Battery has begun construction of its "Giga Arctic" factory in Norway, which is the template for its planned "Giga America" plant in Georgia. European lithium-ion battery upstart Freyr Battery is deepening its transatlantic ties, lured to the US by lucrative incentives that have unleashed a clean energy manufacturing renaissance.

Is Freyr battery a global contender?

FREYR Battery (NYSE: FREY) is increasingly looking to be a global contender in the battery production space as it looks to ramp up to 200 gigawatts per hour (GWh) by 2030 and converts its large base of off-take agreements into sales agreements.

What is Freyr battery?

FREYR Battery aims to provide industrial scale clean battery solutions to reduce global emissions. Listed on the New York Stock Exchange, FREYR's mission is to produce green battery cells to accelerate the decarbonization of energy and transportation systems globally.

How much money does Freyr need to build a Gigafactory in Norway?

This is FREYR's first 29 GWh gigafactory in Norway. For the \$1.7 billion total capital expenditure expected for the gigafactory, FREYR has secured \$1.6 billion in financing support from both the Norway's government and other export credit agencies.

Is Freyr a good battery company?

Although FREYR is positioned in an early stage vs peers in the high-barrier battery market, we think the multiple should reflect its strong growth prospects in the second half of the decade (30% sales CAGR 25-30E vs 27% previously).

New Freyr price target. Previously, Goldman Sachs had given the Freyr Battery share a "Hold" rating, with a price target of \$8.00. Now they have raised the assessment to "Buy" and more than doubled the price target to 19.00 dollars.

FREYR (NYSE: FREY) is a clean energy solutions provider building an integrated U.S. supply-chain for solar and batteries. In November 2024, FREYR announced a transformative transaction, positioning the Company as to be one of the leading solar manufacturing companies in the U.S., with a complementary solar and battery storage strategy.

Freyr battery gigafactory Jordan
