

Future and energy company Taiwan

Can Taiwan secure its energy future?

The MIT Energy Initiative and a consortium of Taiwanese companies are exploring how Taiwan can secure its energy future as the world transitions away from fossil fuels.

What is energy Taiwan?

Opportunities in Just One Stop! The largest and the most iconic renewable energy procurement platform where is an all-star company lineup for various demands! Entering its 15th year, Energy Taiwan, previous PV Taiwan, focuses on Energy Creation, Energy Storage, Energy Saving and Smart System Integration.

Is green energy coming to Taiwan?

"There is a strong will at the highest levels of government to bring green energy to Taiwan. However, at the local level it's still quite challenging," says Leo Seewald, chairman of the Taipei-based solar developer New Green Power. The challenges are forcing developers to get more creative.

What does Taiwan need to meet its future energy requirements?

A second part of what Taiwan needs to meet its future energy requirements is a more dynamic approach to LNG pricing. Taiwan seeks to generate 50 percent of its power from natural gas by 2025.

What is Taiwan's energy security?

Taiwan's energy security is a complex and serious issue, one that cannot be sacrificed to populist or activist sentiment. The future of Taiwan's energy mix must be determined through a rational, fact-based lens, with a clear focus on maintaining economic competitiveness and global leadership in high-tech industries.

Can Taiwan afford to get its energy supply wrong?

One thing's for sure: An independent Taiwan can't afford to get its energy supply wrong. That makes TSMC and Taipower's energy choices over the coming months potentially pivotal, and not only in safeguarding this vulnerable island state. Controlling the supply of chips powering AI may also shape the future of geopolitics.
