Most solar photovoltaic (PV) systems in New Jersey are connected to the local utility's electric system. This connection provides two benefits: First, there will be times when you'll need power from the electric system, like on a cloudy day or when there's snow covering your solar panels. Second, at times when your PV system is generating more power than you need, the excess ...

If you want to get away to get away from it all, forget the Caribbean, the South Pacific, or even the South Pole.
