Battery inverters for large scale storage systems. With an output of up to 3960 kVA and system voltages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants.

Sunny Central Storage UP-S represents a significant advancement in battery storage inverters, delivering power conversion efficiency through its innovative use of SiC Mosfet*semiconductors. It significantly reduces thermal stress while maintaining full operational capacity, even during grid-forming services, setting a new standard for ...

Inverter compatibile con batterie per sistemi di accumulo di grandi dimensioni. Con una potenza fino a 3960 kVA con tensioni di sistema fino a 1500 V CC, SMA Sunny Central Storage consente una progettazione più efficiente e flessibile ...

With a max. output of up to 4600 kVA and system vol-tages up to 1500 V DC, the SMA Sunny Central Storage allows for more efficient and flexible system design for battery power plants. The SCS UP-XT versions allow a system design with higher output power and higher short-circuit current contribution. The intelligent
