Are grid tie inverters worth it?

Grid tie inverters are a great cost-saving addition to your home solar system, but they don't often come cheap. If budget is your primary concern, then you'll be glad to know there is a trustworthy brand out there with a grid tie inverter just for you. Y&H have produced this micro-inverter to cover conversion of DC power up to 350 watts.

Should I get a micro grid tie inverter?

Happy Breffast! If your system is at capacity, or getting too many shades, another option is to get panels with a micro grid tie inverter for each of them, that you could just connect to your off-grid AC circuitry. That way shades on one panel does not reduce down your whole system production, you don't have to invest on thicker wire for panels.

Can I use a battery to power a grid tie inverter?

Can not supply power directly to the AC loads. Please note if using 12v battery as input source, output power will not be 100% if voltage less than 15V. We will suggest using 24v battery as input source to get a better output power. Use a battery to power the inverter, please use a circuit breaker. How to DIY Grid Tie Inverter Solar System?

What is a smart grid tie inverter?

Start DIY your solar system. Reduce your electricity bill. Smart grid tie inverter is a compact unit, which directly converts direct current into alternating current for powering appliances and/or office equipments and connecting to utility grid. The AC output from Smart Micro inverter is synchronized and in phase with the utility grid.
