What are the different types of photovoltaic systems in Hong Kong?

Photovoltaic systems in Hong Kong can be classified into two main types - stand-alone systems and grid-connected systems. These can further be divided into ordinary photovoltaic systems and building-integrated photovoltaic (BIPV) systems.

What is solar energy used for in Hong Kong?

In Hong Kong, the primary use of solar energy is to provide hot water for facilities with heating demand or to generate electricity directly. Some small-scale photovoltaic and wind systems have been installed in remote areas to generate nominal electrical power for lighting and on-site data recording equipment.

What are the different types of solar batteries?

There are two major types of solar batteries: lithium-ion and lead-acid. Out of these two options, lithium-ion batteries are considered ideal for a solar battery storage system. The most popular for energy storage, lithium-ion batteries have the longest lifespan. These batteries are also quite compact and light compared to other battery types.
