How much do solar panels cost on average? Most people will need to spend between \$16,500 and \$25,000 for solar panels, with the national average solar installation costing about \$21,816.. Most of the time, you'll see solar system costs listed as the cost per watt of solar installed so you can easily compare prices between quotes for different system sizes.

There are two types of inverters that may be installed as part of a rooftop solar system. A string inverter takes direct current (DC) power output from all the panels and converts it to alternating current (AC) in one central location. String inverters usually last between 10-15 years and may need to be replaced during the lifetime of the panels.
