The capacity of Hungary's solar energy producers has grown by more than 50 percent, or 1,632 MW, to over 5,600 MW in 2023, the energy ministry said on Thursday. The robust growth means that the capacity originally targeted for 2030 could be available this year already, the statement said. The new target for 2030 is 12 MW, it said.

But the energy mix - the balance of sources of energy in the supply - is becoming increasingly important as countries try to shift away from fossil fuels towards low-carbon sources of energy (nuclear or renewables including hydropower, solar and wind).
