

What is Pixii Bess?

The Pixii BESS plays a vital role in grid support as well, offering frequency and voltage support and contributing to the stability and resilience of the energy network. Ultimately the system can enhance the reliability and sustainability of regional power systems.

How does the Pixii Bess work?

The Pixii BESS saves costs by allowing users to capitalise on arbitrage opportunities by buying low and selling high in the energy market. The system boosts voltage in areas with insufficient grid capacity and provides peak shaving to lower electricity bills and avoid high tariff periods.

Why should you choose Pixii Bess?

Moreover, the Pixii BESS offers robust backup solutions with AC backup and genset integration, ensuring power availability even during outages. The Pixii BESS plays a vital role in grid support as well, offering frequency and voltage support and contributing to the stability and resilience of the energy network.

Does Pixii have a certification?

The certification is mandatory for all installers and is required to offer our extended product warranty. Our interactive sessions provide the knowledge you need to install, maintain and commission our Pixii Home residential Battery Energy Storage System (BESS).

What is a Bess project?

Based on Government Decree 382/2023 (VIII 14) of Hungary, the approach to electricity production and consumption from renewable energy sources has taken a new turn: BESS projects are now among those investments the government intends to support with financial incentives.

What markets does Pixii serve?

With innovative solutions ranging from 3 kW to 1 MW, Pixii serves diverse markets, including distribution system operators (DSO), commercial and industrial (C&I), EV charging, microgrid and off-grid, and telecom. (Read the case studies below.)

Designed for the dynamic needs of today's energy market, the PowerShaperXL family (PowerShaper XL, PowerShaper XL Indoor, PowerBase XL) delivers unparalleled performance and reliability for energy-oriented ...

Pixii's flexible BESS enables a complete value stacking solution to support grid stability and improve power quality. Pixii's BESS technology offers solutions like voltage support and frequency regulation, which stabilize the grid by balancing power supply. These systems also store excess energy when demand is low and release it during peak ...

At Pixii, we are excited to bring the best of European innovation to the United States with our advanced Battery Energy Storage Systems (BESS). With the opening of our office in Denver, ...

Through value stacking, the Pixii BESS is combining both income generating- and cost saving battery services. This ability to leverage a single asset for various revenue-generating activities not only optimizes the ...

As a BESS supplier, we are thrilled to partner with experienced energy management partners to bring you expertise on maximizing returns through strategic BESS deployments. In this ...

Resilience and maximized returns with Pixii. Battery energy storage systems (BESS) continue to represent a profitable and essential investment in the Battery energy storage systems (BESS) ...

Lede chose to collaborate with Pixii, installing a single PowerShaper cabinet. Pixii's sophisticated BESS, equipped with smart inverter technology, not only manages overvoltage; it introduces a streamlined approach to grid management, minimizing the physical and financial disruptions associated with traditional methods. The Benefits

The Pixii BESS also meets international telecom standards and grid codes required for energy redistribution. "Pixii's hybrid BESS is not just a backup solution - it's a strategic asset that transforms telecom infrastructure into an energy hub. By enabling dynamic energy management and participation in revenue-generating markets, our ...

Value stacking is the art of combining multiple services in a Battery Energy Storage System (BESS) to unlock its full potential. ... At Pixii, we have gained extensive experience implementing value stacking strategies through real-world installations. With numerous systems successfully up and running, we have fine-tuned our approach to maximize ...

A recent legislative act in Hungary laid down the principles for the eagerly awaited battery energy storage systems (BESS) support scheme. The incentives follow well-known patterns similar to those already available for ...

Image: Pixii Malaysia's minister of works has celebrated the inauguration of the country's first-ever battery energy storage system (BESS) supplied to an electric vehicle (EV) charging station. The 300kW/300kWh unit was designed and supplied by Norwegian energy storage tech company Pixii and has been installed along Malaysia's main ...

The Pixii PowerShaper XD, is a fully integrated IP55 modular energy storage system designed for easy deployment, high energy density, low noise stand alone or grid connected power. ... This is a state-of-the-art solution meticulously designed for seamless integration with Pixii PowerShaper XD BESS Battery acts as the

This advanced cabinet ...

The PowerShaper PoleTop from Pixii, is an IP55 complete modular energy storage system. ... The PowerShaper PoleTop BESS solution is available as either a single or double cabinet solution, with each cabinet delivering up to 30kW of power conversion and 72kWhr of energy with Polarium's latest Gen 6 9.1kWhr NMC batteries providing high energy ...

The deployment of the first Pixii BESS at one of Milence's site has marked the beginning of an ambitious plan to establish a European network of E-truck charging stations. The Venlo project ...

The Pixii Academy is an e-learning portal designed to help partners and installers educate themselves on the latest in Pixii's modular BESS technologies and best practices. Whether you are new to the field or an experienced professional ...

At the core of all Battery Energy Storage Systems (BESS) from Pixii you find our bi-directional power conversion unit called the PixiiBox. Bi-directionality means that the energy flow can go both ways, from grid to the battery and back to the grid. It connects to a range of energy sources, like solar panels, the grid, generators, and more. ...

One of the biggest benefits of implementing a Pixii Bess with bi-directional converters is the potential to generate additional revenue through the trade of excess energy. This can not only offset the initial investment in these technologies, but also provide a ongoing source of income for telecom operators.

The Pixii BESS enables fast charging even in areas with weak grid infrastructure, while optimizing energy use and generating revenue. Pixii's modular and scalable BESS is designed to grow with your business, keeping investment costs low. ...
