By developing onshore and offshore wind, solar, battery and power-to-X technologies, we are implementing Ignitis Group's strategic priority to deliver 4-5 GW of installed green capacities by 2030. Our values ... Ignitis Renewables is a part of Ignitis Group, thus it follows the common strategy of the Group. Learn more ...

European energy company Ignitis Renewables, along with its partner Ocean Winds, has been selected by Lithuania's National Energy Regulatory Council (NERC) to build a 700MW wind farm, the first offshore ...

The maritime area in the Baltic Sea designated for the offshore wind farm is approximately 120 square kilometres. The farm area is located at least 37 km away from Lithuania's shore. It is estimated that the wind farm will have a total ...

Lithuanian energy company Ignitis Group is entering the Latvian renewable energy market by acquiring three wind farms in early development stages. The company's management board concluded conditional

agreements ...

Ignitis Renewables signed an agreement to acquire 100% of shares of the company developing an onshore wind farm in Poland. The total capacity of the wind farm Silesia II is up to 137 megawatts (MW). The project is currently at an advanced stage of development with an estimated completion in the second half of 2024. [...]

At Ignitis Renewables, we are pioneering the future of energy in the region with our onshore wind projects. As leaders in harnessing the power of the wind, we understand its potential to revolutionize how we generate electricity. Onshore ...

Ignitis Renewables Annual Report 2023 4 / 141 1.1 CEO's statement Dear All, Ignitis Group is creating an energy smart world, which is green, safe, empowering, and sustainable, with a clear commitment to reach net zero emissions by 2050. Ignitis Renewables is at the core of this transformation and is leading the Green generation breakthrough in

The project was developed by IGE and UAB Ignitis Renewables. The project is currently owned by UAB Ignitis Renewables with a stake of 100%. The project generates 300,000MWh electricity and supplies enough clean energy to power 160,000 households, offsetting 120,000t of carbon dioxide emissions (CO2) a year. The project cost is \$138.738m.

"We're immensely thankful for the steadfast collaboration with the EIB and NIB, as their backing is fundamental to the success of our renewable energy projects. At Ignitis Group, we're at the forefront of driving green energy transition in the Baltic region and Poland, aiming for a future powered entirely by sustainable energy.

Working at Ignitis Renewables allows you to be a part of an industry that is constantly evolving (especially now!) and innovating, creates an exciting and dynamic work environment that challenges employees to think creatively and adapt to new technologies and strategies and provides opportunity being at the forefront of innovative and exciting projects that have the ...

„Ignitis renewables“, tarptautinė įmonių energetikos bendrovė, vysto pirmąją jėginio vėjo elektrinių parką Baltijos jalyje „Curonian Nord“. Šis projektas ne tik prisidės prie Lietuvos energetinės nepriklausomybės stiprinimo, bet ir skatins pajūrio regiono ir visos šalies ekonomiką, remis vietos bendruomenių veiklą. ...

„Ignitis renewables“ komanda sudaro energetikai sumanę monetas, kuriuos vienija bendras siekis - sukurti 100 proc. šalių ir saugią energetikos ekosistemą dabarties ir ateities kartoms. Tapkite #EnergySmart dalimi!

„Ignitis renewables“ - tarptautinė įmonių energetikos bendrovė, veikianti Baltijos jalyje ir Lenkijoje. Didžiausią dėmesį ji skiria įmonių gamybos ir aliojo lankstumo technologijoms. ...

The Baltic Sea is perfectly suitable for developing offshore wind projects, but it is very important that the needs of natural environment are also met in the process by applying the environmental impact mitigation measures. There is plenty of evidence suggesting that, if planned appropriately, offshore wind farms can both generate electricity and facilitate biodiversity. [...]

?????????. ??????????(????: Sankattan Siha Na Islas Mariånas ;?: Commonwealth of the Northern Mariana Islands,??CNMI)????????,?????????????? ????15??,??685??(209??),????????????????

At Ignitis Renewables, we harness the boundless power of the sun, a cornerstone of sustainable living and the future of energy. Solar energy, derived from the sun's radiant light and heat, stands at the forefront of renewable energy solutions. Our solar energy projects capture this clean, abundant resource, transforming it into electricity without harmful emissions, [...]

The Northern Mariana Islands, officially the Commonwealth of the Northern Mariana Islands (CNMI), [b] [11] is an unincorporated territory and commonwealth of the United States consisting of 14 islands in the northwestern Pacific Ocean. [12] The CNMI includes the 14 northernmost islands in the Mariana Archipelago; the southernmost island, Guam is a U.S. territory.

Ignitis Renewables manages renewable energy projects in the Baltics and Poland and is responsible for effective operation of wind farms, supervision of projects under construction and development of new ones. ... Ma?eikiai wind farm is a project in the northern part of Lithuania consisting of 14 turbines with a total capacity of 63 MW.
